PROFILE

Results-driven Frontend developer with over two years of experience implementing complex web applications using HTML, CSS, Javascript, React and Nextjs. Skilled in collaborating with cross-functional teams to deliver high-quality projects. Strong analytical and problem-solving skills, focusing on optimising user engagement and conversion rates.

WORK EXPERIENCE

Frontend Developer

Diamond   09/22 - 12/22

- Converted Figma design into a fully functional React application.
- Refractor the already existing code thereby making it modular and scalable.
- Wrote reusable and maintainable code.

Intern Frontend Developer

Celecast   10/22 - 02/23

- Worked collaboratively with a team on a web application.
- Implemented new features, fixed bugs, and optimised the application's performance.
- Worked with Git to track changes in the codebase and work with other developers.

PROJECTS

Mama's Recipe

- Focused on making it easier for users to share their homemade recipes.
- Created using React, Tailwind CSS, Redux, and Vitest.
- Other libraries used are React Icons, React Toastify, Axios, and Emailjs.
